

SUSTAINABLE DEVELOPMENT POLICY

The company Ewa-Bis Sp. z o.o. operates based on the principle of the Sustainable Development Policy, which assumes conscious and properly shaped relations between economic growth, care for the environment and human health.

The Management Board of Ewa-Bis Sp. z o.o. Being aware of the impact of its activities on the natural environment, it operates in an environmentally friendly manner by implementing processes aimed at improving the methods of preventing negative effects on the environment. An element of the company's business strategy is to maintain and continuously improve the environmental management system.

We undertake to comply with the legal requirements and other environmental regulations applicable to our business. As part of activities aimed at environmental protection, we prevent pollution arising in production processes.

In order to implement this policy, we pursue the following strategic goals:

- appropriate waste management
- minimizing the amount of pollutants emitted into the air
- rationalizing the consumption of materials for production
- preventing the possibility of environmental failures by constant monitoring of apparatus and installations.
- reduction of water consumption
- reduction of electricity consumption

We promote and systematically provide employees with information on environmental protection, motivating them to act pro-ecologically. We also involve our suppliers and business partners in these processes. The managerial staff is actively involved in the implementation of strategic environmental goals and monitors the level of their implementation. This environmental policy is known and applied by all employees of Ewa-Bis Sp. z o.o.

Warsaw, 1.04.2022

Member of the Management Board - Marek Marzec
